

01.04.20 Y3 Maths – bus stop division

Division with an exchange:

$$42 \div 3 = 14$$

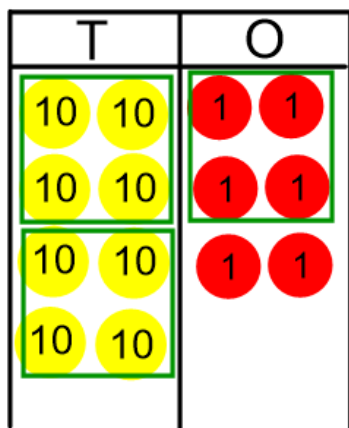

$$\begin{array}{r} 14 \\ 3 \overline{) 42} \end{array}$$

1. With the 4 tens, we can make 1 group of 3 so write 1 above the 4 on the bus stop.
2. There is a ten left over so exchange it for 10 ones. Show on the bus stop that we now have 12 ones.
3. With the 12 ones, we can make 4 groups of 3 so write 4 above the 2 on the bus stop.
4. $42 \div 3 = 14$

Division with a remainder:

$$86 \div 4 = 21 \text{ r } 2$$

$$\begin{array}{r} 21 \text{ r } 2 \\ 4 \overline{) 86} \end{array}$$

1. With the 8 tens, we can make 2 group of 4 so write 2 above the 8 on the bus stop.
2. With the 6 ones, we can make 1 group of 4 so write 1 above the 6 on the bus stop.
3. There are 2 ones left over so we have 'remainder 2' which we write as 'r 2'.
4. $86 \div 4 = 21 \text{ r } 2$

1. $48 \div 3 =$
2. $96 \div 2 =$
3. $75 \div 5 =$

4. $87 \div 4 =$
5. $67 \div 3 =$
6. $59 \div 5 =$

7. $73 \div 3 =$
8. $98 \div 4 =$
9. $86 \div 3 =$

Challenge 1:

Which one's correct?

Find the correct calculation. Spot the mistakes.

$$84 \div 3$$

$$\begin{array}{r} 21 \\ 3 \overline{)84} \end{array}$$

$$\begin{array}{r} 28 \\ 3 \overline{)8^2 4} \end{array}$$

$$\begin{array}{r} 24 \\ 3 \overline{)8^1 4} \end{array}$$

Challenge 2:

$$96 \div 3$$

$$42 \div 3$$

$$62 \div 4$$

Which of these divisions is the easiest and which is the hardest? Explain.
